

Lone Star Downhole Products (LSDP) has built a strong reputation across multiple industries for delivering high-quality, precision-machined components. Operating out of our new multi-building facility - equipped CNC mills and lathes - we support customers from prototype development through full-scale production.

In addition to multi-axis CNC machining, we're well known for our in-house rubber molding and welding/fabrication capabilities. Housing these services under one roof allows us to serve as a true one-stop partner for complex and integrated manufacturing projects.

Our experienced team, paired with ongoing investment in cutting-edge technologies - including robotics and automation—positions us to meet even the most demanding performance and delivery requirements. We take pride in our consistency, efficiency, and unwavering commitment to delivering quality on time - every time.

Differentiators

- Attention to Detail & Quality Assurance
- Fast Production Times
- Cutting-Edge Machinery & Software
- Machining Techniques
- Secured Manufacturing Facility

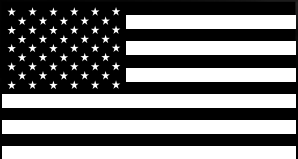

DUNS: 080639866
CAGE CODE: 8JPP2
JCP: APPROVED
ISO 9001-2008 Compliant

In-House Services Include

- CNC Machining
- Rubber Molding
- Fabrication
- Laser Engraving
